

This architectural floor plan shows a 10-story building with a grid of rooms and corridors. A blue line traces a path through the corridors, starting from the bottom left, moving up, then right, and continuing through various corridors and stairwells across the building's footprint. The path appears to be a sequence of connected segments, possibly representing a specific route or a set of connections between different areas of the building.

An architectural elevation drawing of a building facade. The drawing is minimalist, using thin black lines for structural elements and light grey shading for some areas. It features a central tower with a series of windows and a balcony. To the left, there's a lower section with a gabled roof and arched windows. In the foreground, two stylized trees with dense foliage are depicted. The overall style is clean and modern, typical of architectural renderings.
